INTRODUCING

The Unite Passion Project

Through the [Unite Scholars & Mentorship Program](#), [Unite The World With Africa Foundation](#) provides talented-yet-impooverished youth across Tanzania access to quality education. Additionally, Unite provides support from a team of international advisors, mentors, and youth ambassadors to nurture our scholars' creative and independent thinking abilities as well as to help them develop their personal and professional life skills. Our mission is to do everything possible to support Unite Scholars in achieving success as active and engaged global citizens and agents for positive change in the world.

[MORE INFO](#)

The Challenge

Oftentimes when you ask a scholar what he or she would like to do with his or her life, the response will be the same:

“To become a doctor, pilot, or engineer.”

This may be, in part, because the passion for medicine, aviation, and science is what drives them. But more often than not, it is because these young people, most of whom come from remote and under-resourced communities, know of nothing else to dream.

This is where [The Unite Passion Project](#) comes in.

Our Project Goals

01

To expose scholars to an array of career options, activities, and perspectives by sharing the stories of people who have found their passions.

02

To showcase ways various ideas and talents can be translated into meaningful, impactful, and rewarding work.

PASSION VIDEOS SESSION

American diplomat, politician, and lawyer Carol Elizabeth Moseley Braun speaks about doing the best you can with what you have

Soccer coach, soccer agent, entrepreneur, activist James Kitia speaks about soccer and the challenge of impactful impact.

QUESTION/DELIVERABLES

- ⊕ What are the key messages of these videos? What is important about these messages?
- ⊕ In what ways do these messages relate to your life?
- ⊕ What new things have you learned from these speakers?
- ⊕ If you were to meet this speaker in person, what questions would you ask him/her?

Questions for Group Discussions

What did you find most interesting about these talks?

Who in your group/class is most likely to take these career paths and why?

What are a few things that you would do if your circumstances were similar to those of the speakers?
